SOFTWARE ENGINEERING · ACCRA, GHANA

SOFTWARE DEVELOPMENT & LICENCE AGREEMENT

Radiance POS — Point of Sale & Inventory Management System

A multi-outlet retail operating system covering point of sale, stock control, cash reconciliation, credit management and business reporting — delivered, hosted, installed and supported for the life of the system.

AGREEMENT REFERENCE
GLT-POS-2026-001

CONTRACT VALUE
GH₵ 5,000.00

PREPARED FOR
[CLIENT LEGAL NAME]

DELIVERY WINDOW
Eight (8) weeks

PREPARED BY
GiftedLabs Technologies

DATE OF ISSUE
[DATE]

1. The Parties

This Software Development and Licence Agreement (the **"Agreement"**) is made on [DATE] between:

The Developer	**GiftedLabs Technologies**, of [REGISTERED ADDRESS], Ghana — business registration no. [REG. NO.], acting through its authorised representative [NAME, TITLE] ([EMAIL] · [PHONE]) (**"GiftedLabs"**).
The Client	**[CLIENT LEGAL NAME]**, of [CLIENT ADDRESS], Ghana — trading from its retail outlets at [OUTLET 1 NAME & TOWN] and [OUTLET 2 NAME & TOWN], acting through [NAME, TITLE] ([EMAIL] · [PHONE]) (the **"Client"**).

GiftedLabs and the Client are each a **"Party"** and together the **"Parties"**.

2. Background

2.1 The Client operates a retail business trading in lighting, electrical and hardware goods from two outlets, and requires a computerised system to record every sale, maintain accurate stock figures per outlet, reconcile cash daily, track customer credit, and give the owner a single view of the whole business.

2.2 GiftedLabs has designed and built **Radiance POS**, a point-of-sale and inventory management system engineered specifically for Ghanaian multi-outlet retail — including mobile money payments, multi-unit selling with conversions, trade and contractor price tiers, installment credit, and operation on unreliable power and internet.

2.3 The Client wishes to engage GiftedLabs to complete, deploy, configure and support that system for its two outlets, and GiftedLabs agrees to do so on the terms set out below.

3. Definitions

System	The Radiance POS software described in **Schedule A**, as deployed and configured for the Client.
Outlet	A physical retail location of the Client registered in the System. This Agreement covers **two (2) outlets**.
Go-Live	The date on which the System is in productive use for real trading at both Outlets.
Client Data	All product, customer, supplier, sales, stock, cash and user data entered into or generated by the System. Owned entirely by the Client.
Defect	A reproducible failure of the System to perform as described in Schedule A.
Business Hours	08:00–18:00 GMT, Monday to Saturday, excluding Ghanaian public holidays.
Change Request	Any request for functionality outside Schedule A, handled under clause 12.

4. Scope of Work

4.1 GiftedLabs shall deliver the System with the functionality set out in **Schedule A (Delivered Functionality)**. Schedule A forms part of this Agreement and is the definitive statement of what is being purchased.

4.2 Delivery comprises the following work streams:

WORK STREAM	WHAT GIFTEDLABS DOES
Software delivery	Completion, testing and release of every module listed in Schedule A.
Hosting & domain	Provisioning of cloud hosting, a managed database, SSL and one domain name — free for twelve (12) months from Go-Live (clause 8).
Deployment	Installation and configuration at **both** Outlets: counter terminals, thermal receipt printers (80mm and 58mm), barcode scanners, network and printing service.
Configuration	Registration of the business profile, both Outlets, receipt templates, user accounts, roles, permissions, manager PIN policy, price tiers and stock thresholds.
Data migration	Import of the Client's product catalogue, opening stock, customers and suppliers from the templates supplied by GiftedLabs, using the built-in import wizard (clause 10.2).
Training & onboarding	Role-based training of the Client's staff and supervised go-live support at both Outlets (clause 9).
Technical support	Lifetime technical support on the delivered System (clause 7).

4.3 Functionality not listed in Schedule A is outside this Agreement. **Schedule B** lists items expressly excluded so that neither Party is in doubt.

5. Contract Price and Payment

5.1 The total price for everything in clause 4 is **five thousand Ghana Cedis (GH₵ 5,000.00)**. This is a fixed price, not an estimate. It is inclusive of the hosting, domain, deployment, training and lifetime support described in this Agreement.

5.2 The price is payable in three instalments:

STAGE	TRIGGER	SHARE	AMOUNT	DUE
1	**Commencement.** On signature of this Agreement, before development work begins.	30%	**GH₵ 1,500.00**	On signing
2	**Build complete and reviewed.** The System is built, demonstrated to the Client on a staging environment, and the Client has walked through it and confirmed the functionality in Schedule A is present.	30%	**GH₵ 1,500.00**	7 days from review

STAGE	TRIGGER	SHARE	AMOUNT	DUE
3	**Setup and training complete.** The System is installed and configured at both Outlets and staff training has been delivered.	40%	**GH₵ 2,000.00**	7 days from training
Total contract price		**100%**	**GH₵ 5,000.00**	

5.3 Payment is made to the account nominated by GiftedLabs in writing. Mobile money and bank transfer are both accepted. GiftedLabs issues a receipt for each instalment.

5.4 Where the Client raises no written objection within **seven (7) days** of a stage being presented, that stage is deemed accepted and the instalment falls due.

5.5 Invoices unpaid **fourteen (14) days** past their due date carry interest at 2% per month on the outstanding balance. GiftedLabs may suspend hosting and support — but never delete or withhold Client Data — while an instalment remains overdue beyond thirty (30) days, having first given seven (7) days' written notice.

5.6 The price excludes hardware. Counter terminals, thermal printers, barcode scanners, UPS units, internet connectivity and any third-party charges are procured and paid for by the Client (clause 10.1). GiftedLabs will supply a written specification and may assist with sourcing at no charge.

6. Timeline

6.1 GiftedLabs shall deliver the System within **eight (8) weeks** of the later of (a) receipt of the first instalment and (b) delivery by the Client of the inputs listed in clause 10.2. GiftedLabs may deliver earlier, and the payment stages in clause 5.2 are triggered by the events described rather than by the passage of time — so early delivery brings the stages forward.

6.2 Indicative schedule:

PERIOD	ACTIVITY
Weeks 1–2	Configuration workshop, business rules confirmed, data templates issued, catalogue and stock data collection begins.
Weeks 3–5	Completion of the System against Schedule A; internal testing; staging environment made available to the Client.
Week 6	Client walkthrough and review on staging. Feedback logged and resolved. *Stage 2 payment.*
Week 7	Data migration, hardware installation and configuration at Outlet 1 and Outlet 2. Receipt printing and scanning verified on the real hardware.
Week 8	Staff training at both Outlets, supervised Go-Live, handover of documentation. *Stage 3 payment.*

6.3 Time lost while GiftedLabs waits on Client inputs, approvals, hardware, internet provisioning or site access extends the delivery date day-for-day. GiftedLabs will notify the Client in writing when a dependency is holding up work.

7. Lifetime Technical Support

> **INCLUDED AT NO FURTHER CHARGE**
>
> GiftedLabs provides **lifetime technical support** on the delivered System, for as long as the Client operates it. There is no support fee, no annual renewal and no per-user charge.

7.1 Support covers, without charge and without time limit:

- Diagnosis and correction of Defects in the System.
- Assistance with day-to-day use — questions from cashiers, storekeepers, managers and the owner.
- User account administration: creating, resetting and deactivating accounts, PINs and permissions.
- Reconfiguration of receipts, price tiers, thresholds, categories, outlets and other settings.
- Assistance recovering from data-entry errors, and guidance on stock and cash discrepancies arising from use of the System.
- Security patches, dependency updates and maintenance releases of the System.
- Help re-installing the System after a device is replaced, repaired or re-imaged.

7.2 Support is delivered remotely during Business Hours by telephone, WhatsApp, email and remote desktop. On-site attendance is provided where a problem genuinely cannot be resolved remotely; travel outside [BASE TOWN] is charged at cost, agreed in advance.

7.3 Target response times, measured within Business Hours:

SEVERITY	MEANING	FIRST RESPONSE	TARGET FIX
Critical	An Outlet cannot sell — the POS or payment flow is down.	2 hours	Same day
High	A core function fails but a workaround exists (e.g. reports, goods receipt).	1 business day	3 business days
Normal	Minor Defect, question, or configuration request.	2 business days	By agreement

7.4 **What lifetime support is not.** To keep the commitment honest and sustainable, support does not include: new features or modules not in Schedule A (these are Change Requests under clause 12); the Stage 2 and Stage 3 items in Schedule B; hosting and domain fees after the first twelve months (clause 8.3); repair or replacement of the Client's hardware, printers, network or electricity supply; third-party services and their charges; recovery of data lost through the Client's own deletion where no backup exists; or retraining beyond clause 9 arising from staff turnover, which is offered at a reduced day rate agreed in advance.

7.5 Support survives full payment and continues indefinitely, subject only to clause 15 (Termination) and to the System remaining substantially unmodified by anyone other than GiftedLabs.

8. Hosting, Domain and Data

8.1 GiftedLabs shall provide, at no additional cost for **twelve (12) months from Go-Live**: cloud hosting of the application and database, one domain name of the Client's choosing (subject to availability), an SSL

certificate, and **automated daily backups** retained for no less than thirty (30) days.

8.2 GiftedLabs targets **99% monthly availability** of the hosted System, excluding scheduled maintenance notified in advance, and excluding outages of the Client's own internet or power.

8.3 After the first twelve months, hosting and domain renewal are charged at cost. GiftedLabs shall notify the Client of the renewal amount not less than **thirty (30) days** before it falls due. The Client may instead elect to hold the hosting account and domain in its own name, and GiftedLabs will migrate the System and transfer the domain at no charge.

8.4 **The Client owns all Client Data absolutely.** The Client may request a complete export — the built-in JSON archive together with accounting CSV exports — at any time and for any reason, and GiftedLabs shall provide it within five (5) business days at no charge. This right survives termination.

8.5 GiftedLabs shall not access Client Data except as necessary to deliver support, migration or backup, shall not disclose it to any third party, and shall not use it for any purpose other than performing this Agreement.

9. Training and Onboarding

9.1 GiftedLabs shall deliver role-based training on site at both Outlets, in plain language, using the Client's own products and prices rather than sample data:

ROLE	COVERED
Cashiers	Opening a shift, scanning and searching, selling in different units, trade and contractor pricing, discounts and approvals, all payment methods including split payments, holding and resuming sales, printing and reprinting receipts, closing a shift and counting the drawer.
Storekeepers	Receiving goods against a supplier invoice, stock adjustments with reasons, write-offs, low-stock review, stock counts and reading the movement history.
Managers	Approvals and the manager PIN, voids and returns, installment plans and collections, expenses, end-of-day reconciliation, variance investigation and the control reports.
Owner	The dashboard, outlet comparison, profit and margin reporting, the analytics and inference workspace, users and permissions, the audit trail, and backups and exports.

9.2 Training includes a written quick-reference guide for each role and **supervised go-live support** — GiftedLabs present at the counter for the first trading day at each Outlet.

9.3 A **follow-up session** is included at each Outlet within thirty (30) days of Go-Live, to answer the questions that only surface once staff have been trading on the System.

9.4 Onboarding questions after that period are handled under lifetime support (clause 7). Full retraining of newly hired staff is available at a reduced day rate.

10. Client Responsibilities

The delivery date in clause 6 assumes the Client meets these obligations promptly.

10.1 **Hardware and environment.** The Client shall provide, at each Outlet: a counter computer meeting the written specification supplied by GiftedLabs, a USB thermal receipt printer, a barcode scanner, a UPS, and a

working internet connection.

10.2 **Business inputs.** The Client shall supply, in the templates provided by GiftedLabs: the product catalogue with prices, units and conversions; opening stock quantities per Outlet; supplier and customer records; the business logo and receipt footer wording; the staff list with roles per Outlet; and its decisions on price tiers, discount ceilings and approval thresholds.

10.3 **People and access.** The Client shall nominate one person with authority to make decisions and give approvals, make staff available for training on the agreed dates, and provide site access for installation.

10.4 **Accuracy.** GiftedLabs migrates the data it is given. The Client is responsible for the accuracy of its own product, price and opening stock figures.

10.5 **Approvals.** The Client shall respond to written requests for approval within five (5) business days. Silence beyond that period is treated as approval so that the project is not stalled.

11. Acceptance

11.1 On completion of the build, GiftedLabs shall make the System available on a staging environment and demonstrate it against Schedule A. The Client has **seven (7) days** to review it and report, in writing, any item of Schedule A that is absent or not working.

11.2 GiftedLabs shall correct reported Defects at no charge and re-present. Anything not listed in Schedule A that the Client asks for at this point is a Change Request, not a Defect.

11.3 The System is deemed accepted on the earlier of (a) written acceptance, (b) expiry of the seven-day review period without written objection, or (c) the Client using the System for real trading at either Outlet.

11.4 **Warranty.** For **ninety (90) days** from Go-Live, GiftedLabs warrants that the System will perform substantially as described in Schedule A and shall correct any Defect at no charge and as a priority. Thereafter, Defects continue to be corrected without charge under lifetime support (clause 7).

12. Changes to Scope

12.1 Either Party may propose a change. GiftedLabs shall respond in writing with the effect on price and timeline. No change is binding, and no work on it begins, until both Parties have agreed it in writing.

12.2 Minor adjustments — wording, labels, receipt layout, report columns, colour and configuration — are made at no charge as part of normal delivery and support.

12.3 Substantial new functionality, including the Stage 2 and Stage 3 items in Schedule B, is quoted separately. GiftedLabs shall offer the Client its standard rates less **fifteen per cent (15%)** for as long as this Agreement remains in force.

12.4 Adding a **third or subsequent Outlet** is a Change Request. The System is already built to accommodate further Outlets, so the charge covers setup, data configuration, installation and training only — not redevelopment.

13. Intellectual Property and Licence

13.1 GiftedLabs retains ownership of the Radiance POS source code, its design, architecture, and all components, libraries and tooling created before or during this Agreement.

13.2 On payment in full, GiftedLabs grants the Client a **perpetual, irrevocable, non-exclusive, non-transferable licence** to use the System for the operation of its retail business, without limit on the number of users, terminals or transactions, at the Outlets covered by this Agreement and any further Outlets added under clause 12.4.

13.3 The licence is perpetual and does not lapse. It cannot be revoked for any reason other than the Client sub-licensing, reselling or redistributing the System to a third party.

13.4 The Client shall not sell, sub-license, rent or redistribute the System, nor make it available to another business, without the prior written consent of GiftedLabs.

13.5 **Client Data is not licensed — it is owned outright by the Client** (clause 8.4). Nothing in this clause gives GiftedLabs any interest in it.

13.6 The Client's name, logo and branding remain the Client's property. GiftedLabs may state that the Client is a customer and show the System in its portfolio, unless the Client objects in writing.

13.7 Where the Client requires assignment of the source code, that is available as a separate written agreement at an additional fee.

14. Confidentiality, Liability and Indemnity

14.1 Each Party shall keep confidential all commercial, financial and technical information of the other, during this Agreement and for three (3) years afterwards.

14.2 The Client remains responsible for its own trading records, cash handling, stock accuracy and tax compliance. The System is a tool for recording and reporting the business; it does not replace the Client's own controls, its accountant, or its obligations to the Ghana Revenue Authority.

14.3 GiftedLabs' total aggregate liability under this Agreement is limited to the total price actually paid by the Client, being GH₵ 5,000.00.

14.4 Neither Party is liable for indirect or consequential loss, including loss of profit, loss of business or loss of goodwill.

14.5 Nothing in this Agreement limits liability for fraud, wilful misconduct, or any liability that cannot lawfully be limited.

14.6 **Force majeure.** Neither Party is in breach for a delay caused by an event beyond its reasonable control, including sustained power or internet failure, civil disturbance, or the failure of a third-party service provider. The affected Party shall notify the other promptly and resume as soon as it can.

15. Termination

15.1 Either Party may terminate on **thirty (30) days'** written notice, or immediately if the other commits a material breach and fails to remedy it within fourteen (14) days of written notice.

15.2 On termination the Client shall pay for all work completed to the date of termination. Sums already paid for completed stages are not refundable.

15.3 On termination for any reason, GiftedLabs shall deliver to the Client a complete export of Client Data within five (5) business days, at no charge, and shall cooperate in good faith with any migration.

15.4 Clauses 8.4 (data ownership), 13 (intellectual property and licence), 14 (confidentiality and liability) and 16 (governing law) survive termination.

16. General

16.1 This Agreement, together with Schedules A, B and C, is the entire agreement between the Parties and supersedes all prior proposals, quotations and discussions.

16.2 No variation is effective unless in writing and signed by both Parties. Written confirmation by email from the nominated representatives is sufficient.

16.3 Neither Party may assign this Agreement without the other's written consent, which shall not be unreasonably withheld.

16.4 GiftedLabs is an independent contractor. Nothing here creates a partnership, joint venture or employment relationship.

16.5 If any provision is held invalid, the rest remains in force.

16.6 The Parties shall attempt in good faith to resolve any dispute by discussion within thirty (30) days before commencing proceedings.

16.7 This Agreement is governed by the laws of the **Republic of Ghana** and the Parties submit to the exclusive jurisdiction of the Ghanaian courts.

16.8 This Agreement may be signed in counterparts, and scanned or electronic signatures are as effective as originals.

17. Execution

The Parties, having read and understood this Agreement and its Schedules, sign below as evidence of their agreement to be bound by it.

FOR GIFTEDLABS TECHNOLOGIES	FOR THE CLIENT
Signature	Signature
Name and title (block capitals)	Name and title (block capitals)
Date	Date

Please initial each page. Return one signed copy to GiftedLabs together with the Stage 1 payment of GH₵ 1,500.00 to commence work.

Schedule A — Delivered Functionality

This Schedule is the definitive statement of what the Client is purchasing. Every module below is part of the System delivered under clause 4.1 and covered by the warranty in clause 11.4 and by lifetime support under clause 7.

A1 Authentication, Roles and Access Control

Staff sign-in with username and password; outlet selection on entry; screen lock with PIN re-entry so a cashier can step away without ending a shift; idle session timeout. Four role types — Owner, Manager, Storekeeper, Cashier — governed by a full permissions matrix covering selling, discounting, voiding, price visibility, stock adjustment, cash movement, reporting, user management and settings. Per-user grants and revocations against the role baseline. Controls a user has no permission for are not displayed at all rather than shown and disabled. Manager PIN approval for privileged actions, with the approver's identity recorded against the transaction.

A2 Point of Sale Terminal

A dedicated full-screen selling terminal. Product tile grid with category filtering, live search and barcode scanning. **Multi-unit selling with conversions** — cable bought by the drum and sold by the metre, bulbs bought by the carton and sold singly — with a unit picker showing the price for each unit. **Trade and contractor price tiers** applied automatically once a customer is attached. Line-level editing: quantity, unit, price and line discount. Cart-level discount with a permitted ceiling. **Floor-price protection** — a sale below the product's floor price requires manager PIN approval and records the approver. Customer attachment by phone search, with quick customer creation at the counter. Hold and resume multiple parked sales. Keyboard shortcuts throughout. Out-of-stock and unknown-barcode handling that informs rather than blocks.

A3 Payments and Receipts

Cash with denomination shortcuts and large change display; **mobile money across MTN MoMo, Telecel Cash and AT Money** with network selection, payer number, transaction reference and explicit received-confirmation; card and bank transfer with reference capture; and **split payments** across multiple methods with a running balance that will not complete until the amount due reaches zero. Receipt generation and printing to **80mm and 58mm** thermal printers with an on-screen preview, configurable header, logo, footer and returns wording. Reprint of any past receipt. Print failure never blocks a sale — the sale is saved and printing can be retried. Receipt numbering is sequential per Outlet and per terminal, gapless and never reused.

A4 Cashier Shifts and Cash Control

Opening a shift with a counted float; a **blind close** in which the cashier counts the drawer by denomination without seeing what the system expects; variance revealed only after submission, with a mandatory written explanation beyond a configurable threshold. Shift register showing outlet, cashier, times, sales total, expected cash, counted cash and variance. Cash movements in and out of the drawer — banking, owner drawings, supplier payments, float transfers — each with a reason and a user. End-of-day reconciliation per Outlet with takings broken down by payment method.

A5 Product Catalogue

Full catalogue with images, SKUs, multiple barcodes, categories, brands and supplier links. Per-product selling units with conversion factors and a price for each unit. Four price points per product — cost, retail, trade and floor — with live margin calculation and optional per-Outlet overrides. Cost price hidden from users without permission. Price change history. Category, brand and unit-of-measure management. **CSV import wizard** with template download, column mapping, row-level validation, error reporting and a preview before commit. Bulk price updates across a filtered selection with an affected-count preview.

A6 Inventory Control

Stock held **per product per Outlet** — there is no single global quantity anywhere in the System. Every change is a movement row carrying the Outlet, quantity delta, reason, user, timestamp and source document, so the current level always equals the sum of its movements. Goods receipt against a supplier with purchase units, unit costs and a confirmation step showing the resulting stock and the new **weighted average cost**. Stock adjustments with a mandatory reason, value impact and approval above a threshold. Damage and write-off recording. Low-stock list grouped by supplier with suggested reorder quantities. Stock valuation at cost by category and Outlet. Physical stock count with variance review. Stock transfer between Outlets. An exceptions register surfacing oversells, large adjustments and write-offs for review.

A7 Sales History, Voids, Returns and Exchanges

Searchable transaction history filtered by date, receipt number, customer, amount, cashier and Outlet, with a full sale detail view showing lines, units, payments, cashier, terminal and any approver. Completed sales are immutable — correction is by void, which writes reversing stock movements and leaves both records visible, requires a reason and manager approval, and is logged. **Returns and exchanges** against an original receipt: select the lines and quantities being returned, record replacement items on a swap, calculate the balance due either way, and print a return voucher. Return and void registers exportable to CSV.

A8 Installment Plans and Customer Credit

Creation of a written installment agreement against a customer, with the items, total value, deposit and payment schedule. Recording of each collection with a printed payment slip. Automatic identification of **overdue plans**, outstanding balances and credit ageing. Portfolio metrics showing total credit extended, collected and at risk. Full export to CSV. This addresses the single largest cash risk in hardware retail — goods released on trust and paid for later.

A9 Customers and Suppliers

Customer register with phone-number search, customer type mapped to a price tier (retail, electrician, contractor), purchase history across both Outlets, total spent and purchase count. Supplier directory with contacts, payment terms, products supplied, goods-receipt history and total purchased.

A10 Expenses and Profitability

Operational expense ledger by category and Outlet with dates and notes. Automatic calculation of gross revenue, cost of goods sold at the cost frozen on each sale line, gross profit, total operating expenditure and **net profit or loss**. Category breakdown of where the money is going. Because cost is frozen at the moment of sale, later price or cost changes never rewrite historical profit.

A11 Dashboard and Business Reporting

A role-aware dashboard: the Owner sees both Outlets combined or separately with today’s sales, estimated profit, expected cash and stock value; the Manager sees one Outlet operationally; the Cashier sees only their own shift and their own sales, with no profit or stock value. Reports covering sales by day, product, category, cashier and customer; gross profit and margin; best sellers and slow movers; stock on hand and stock movements; payment method breakdown; the discount and override log; the void and refund log; and purchases by supplier. Every report is available per Outlet and combined, with date-range presets and CSV export.

A12 Outlet Comparison and Analytics Workspace

Side-by-side comparison of the Outlets on revenue, margin, transaction count, average sale and stock position. An analytics workspace with six chart families — sales and margin velocity, comparative outlet performance, category mix, payment channel distribution, installment credit ageing and top-mover velocity — supported by an **inference engine** that reads the figures and writes a plain-language commentary: an executive summary, a financial health grade, an explanation of what each chart is showing and where the risks and opportunities sit. Preset questions cover margin comparison between the lighting and hardware lines, debtor and installment risk, fast versus dead stock, and payment method friction, and free-text questions can be asked of the data. The engine falls back to a deterministic rules model so the workspace continues to produce analysis when the network is unavailable.

A13 Audit Trail

A read-only record of consequential actions — price changes, stock adjustments, voids, discounts and overrides, permission changes, user administration and settings changes — each with the user, the Outlet, the timestamp and the before and after values. Filterable by user, action, entity, Outlet and date. It cannot be edited or deleted from within the System by anyone, including the Owner.

A14 System Settings and Administration

Store profile with legal identity, currency and rounding. Registration and management of branches with staff assignment, so further Outlets can be added without redevelopment. User accounts with credentials, PINs and Outlet assignment. The roles and permissions matrix. Manager PIN policy governing floor-price and void overrides. Hardware and receipt configuration with 80mm and 58mm templates and a test print. Theme and accent colour with a live preview. **Backup and export** — a complete JSON archive of the business and accounting CSV exports, available to the Client on demand.

A15 Operating Characteristics

Global search across products, customers, suppliers and sales from any screen. Consistent loading, empty, error and permission states throughout. Amounts held in minor units as integers so rounding never drifts; quantities held to three decimal places to support cut lengths. Every sale carries a unique identifier so a double-click, retry or reconnection can never create a duplicate sale or a duplicate payment. Stock decrements happen inside a locked database transaction, so two terminals cannot sell the same last unit. Designed desktop-first for the counter, usable on a tablet in the store room, and readable on the Owner's phone for the dashboard and reports.

Schedule B — Not Included

Listed explicitly so that neither Party is in any doubt. Any item below can be added under clause 12 as a separately quoted Change Request, at GiftedLabs' standard rates less 15%.

AREA	EXCLUDED FROM THIS AGREEMENT
Tax and compliance	VAT, NHIL and GETFund calculation and reporting; tax invoicing; integration with the Ghana Revenue Authority Certified Invoicing System (E-VAT). Receipts show prices as charged, with no tax breakdown.
Accounting	General ledger, trial balance, financial statements, bank reconciliation and payroll. The System exports accounting CSVs for the Client's accountant; it is not an accounting package.
Procurement	Purchase orders, supplier ageing and payables. Goods receipt is included; the ordering cycle preceding it is not.

AREA	EXCLUDED FROM THIS AGREEMENT
Integrations	Bank or mobile-money API integration — payments are recorded with a reference, not verified automatically against the network. No SMS or email receipts, no accounting software integration.
Extended commerce	Online store, e-commerce, customer mobile application, loyalty programme, quotations and proforma invoices, barcode label design and printing, delivery scheduling.
Product depth	Product variant matrices, serial number tracking, expiry date tracking, batch and lot control, manufacturing or kit assembly, multi-currency.
Hardware	Supply, repair or replacement of computers, printers, scanners, UPS units, cash drawers, customer displays, networking equipment or internet service (clause 5.6).
Third parties	Charges levied by any third-party service, and hosting or domain renewal after the first twelve months (clause 8.3).

Schedule C — Payment Stage Criteria

What must be true before each instalment under clause 5.2 becomes payable.

STAGE	CRITERIA
Stage 1 — 30% **GH₵ 1,500.00**	This Agreement signed by both Parties. Payable before development work begins; the eight-week clock in clause 6.1 starts on receipt.
Stage 2 — 30% **GH₵ 1,500.00**	Every module in Schedule A is present and functioning on a staging environment reachable by the Client; the Client has been given credentials and a walkthrough covering each module; the Client has had seven days to review and any Defects raised in that period have been corrected; and the System has been accepted under clause 11.3.
Stage 3 — 40% **GH₵ 2,000.00**	The System is live on production hosting under the Client's domain; the Client's product catalogue, opening stock, customers and suppliers have been migrated; both Outlets, their users, roles, permissions, price tiers and receipt templates are configured; counter terminals, receipt printers and scanners are installed and verified working at **both** Outlets, with a successful test sale and printed receipt at each; role-based training has been delivered to the Client's staff at both Outlets per clause 9.1; and quick-reference guides have been handed over.

CONTINUING AFTER STAGE 3

Lifetime technical support (clause 7), free hosting and domain for twelve months from Go-Live (clause 8.1), the ninety-day warranty (clause 11.4), the follow-up training session within thirty days (clause 9.3) and the Client's perpetual licence (clause 13.2) all continue at no further charge once Stage 3 is paid.
